

### **AMENDMENTS TO THE DRAWINGS:**

The attached sheet of drawings 1/9 includes changes to Figure 2. In Figure 2 radiation source 100 has been added. The sheet also includes a sheet numbering change as the overall number of sheets have increased from 5 to 9.

The attached sheet of drawings 2/9 includes changes to Figure 3. In Figure 3, axis of rotation 6' has been added to illustrate offcenter rotation about trough 13. The sheet also includes a sheet numbering change as the overall number of sheets have increased from 5 to 9.

The attached sheet of drawings 3/9 includes changes to Figures 4 and 5 wherein reference numeral 200 has been added identifying a means for applying vibration to a support member. The sheet also includes a sheet numbering change as the overall number of sheets have increased from 5 to 9.

The attached sheet of drawings 4/9 includes changes to Figure 6 wherein feed means 90 have been added for adding a reactant to product collected. The sheet also includes a sheet numbering change as the overall number of sheets have increased from 5 to 9.

The attached sheet of drawings 5/9 includes a sheet numbering change as the overall number of sheets have increased from 5 to 9. The sheet also includes a sheet numbering change as the overall number of sheets have increased from 5 to 9.

The attached sheet of drawing 6/9 includes new Figure 9 which shows an axis 6 inclined with respect to a direction of terrestrial gravity.

The attached sheet of drawing 7/9 includes new Figure 10 which shows an axis 6 which is substantially perpendicular to a direction of action of terrestrial gravity.

The attached sheet of drawing 8/9 includes new Figure 11 which shows a plurality of troughs 13, 13' is provided in the surface 5.

The attached sheet of drawing 6/9 includes new Figure 12 which shows a plurality of support elements 3 mounted on a plurality of axes of rotation 6.

All sheets have been renumbered.
